

PRESS RELEASE
15 September, 2007, HONG KONG

WORLD-WIDE FIRST COMMERCIAL DEPLOYMENT
**4 units of CyberMedia Security Door Lock System at “The Legend”, Jardine’
Lookout, Hong Kong**

The CyberMedia Security Door Lock System “CSDL”(HK Patent no.:HK1083982) is the most innovative application invented by Cybersys. 4 units are installed in the four towers of luxurious apartments called “The Legend” developed by Cheung Kong (Holdings) Limited.

CSDL focus on user and environmental friendliness. The CSDL are installed at the front entrance to each tower and linked by Internet to the residents' video phones located in the apartments. The resident can identify the visitor and trigger the door lock on the video phone. Moreover, the resident can forward the video phone to the other 3G / GSM mobile phones. Therefore, wherever there is GSM, 3G or Internet in the World, the user shall never miss the visitor. It also phases out the traditional door lock system by placing the residential door lock function into an IP video phone.

Product features of CSDL:

- Combine videophone and broadband technology;
- Savings on wiring and other door lock hardware;
- Using 3G/GSM to remote control the door lock system.
- Digitize property management notices;

The CSDL is also PERFECT for As information kiosk to enhance customer service on 24 hours / 7 days a week basis or as an additional “receptionist”.
